The **FARM INCOME SITUATION**

JULY 1957

FIS-164

FARM INCOME IN THE FIRST HALF OF 1957

Farmers' realized net income in the first half of 1957 was at an annual rate of approximately 12.1 billion dollars. This was $2\frac{1}{2}$ percent higher than in the first half of 1956.

Cash receipts from farm marketings were slightly above last year due to higher average prices. Government payments, primarily those under the Soil Bank program, were also at a higher rate, so that realized gross farm income was up about 3 percent from the first half of 1956. Production expenses were higher, but not enough to offset the increase in gross income. Prices paid by farmers for all production items averaged 5 percent higher in the first half of 1957 than a year earlier. Contributing to this increase were higher interest charges, wage rates, and property taxes, plus higher prices paid for feeder livestock, feed, seed, motor vehicles, machinery, building materials, and farm supplies. Fertilizer was the only important cost item not showing an increase in average prices. However, smaller acreage in cultivation, increasing efficiency, and continuing efforts of farmers to hold production costs in check have provided some offset to rising cost rates.

Annual and quarterly estimates of farm income from 1954 to date are revised in this issue (table 1). Quarterly estimates for 1952 and 1953 are not revised, but they are also included in table 1 so that only one earlier issue of The Farm Income Situation (December 1955) will be needed to carry the quarterly estimates back to 1929.

The revisions for 1954-56 mainly reflect further realignment to the 1954 Census of Agriculture. Their net effect was to raise the estimates of both gross farm income and production expenses, but gross income was increased more than expenses. As a result, the estimates of realized net income are approximately 200 million dollars higher than before in each of the last three years. The year-to-year changes are not much affected; for example, realized net income in 1956 remains 4 percent above 1955.

Cash receipts from farm marketings

Cash receipts from farm marketings in the first half of 1957 totaled approximately 12.6 billion dollars, or 1 percent higher than in the first six months of 1956. Prices of farm products averaged 3 percent higher than in the corresponding months of last year; but the volume of marketings was slightly smaller. The estimate of total cash receipts for the first six months of 1957 includes a preliminary estimate for June. It also includes some revisions, discussed below, in estimates previously published for the earlier months of the year.

Farmers received about 8.1 billion dollars from livestock and live-stock products in the first half of 1957, and about 4.5 billion from crops. The livestock total was up 4 percent from last year as a 6-percent rise in average prices more than offset a slight decline in volume. Cash receipts from meat animals in total were up 12 percent and dairy receipts rose 5 percent, more than offsetting a decline of 14 percent for poultry and eggs.

Total crop receipts were down 3 percent in the first six months of 1957, reflecting both slightly smaller marketings and slightly lower average prices. The decline was mostly in cotton, fruits, and vegetables.

Total cash receipts from farm marketings in June are tentatively estimated at 2.1 billion dollars, practically the same as in June a year ago. June crop receipts are estimated at 0.8 billion dollars, and receipts from live-stock and products at 1.3 billion.

Revised monthly data

Previously published monthly estimates of cash receipts from farm marketings for January-March 1957 are revised in this issue. The revised estimates for commodity groups are given in tables 3 and 5, and revised estimates for the individual States appear in tables 7-12. The monthly estimates for January-May 1956, also given for comparison, are revised in line with the revised annual 1956 estimates, shown for the United States only on pages 13-15. Revised monthly State estimates for the whole year 1956 will be published in the next issue.

Revisions for the early months of 1957 were made so as to incorporate new information on the monthly pattern of farm marketings. They are based in considerable part on the Crop Reporting Board's report covering 1956 crop production and disposition. Their net effect is to raise the previously published first quarter total of cash receipts by only 42 million dollars. The revisions are significant in some States, however.

1/ Estimated sales of farm butter have been deducted from home consumption and added to cash receipts.

2/ Cash receipts include value of home consumption which is less than 1 percent.

3/ Ducks, geese, guineas, quail, pheasants, turkey hatching eggs, all other.

4/ Honey, horses, mules, beeswax, bees, goats, minks, silver foxes, rabbits.

5/ Not available for individual commodities.

6/ Cantaloups, honeydews, Persians, casabas, and other miscellaneous melons.

7/ Turnips, okra, radishes, squash, green onions, parsley, collards, mustard greens, parsnips, turnip greens, rhubarb, hot peppers, horseradish, pumpkins, rutabagas, dandelion greens, Chinese cabbage, salsify, kohlrabi, watercress, Swiss chard, all other.

8/ Sweet corn for seed, sugar-beet seed, safflower, castor beans, Bermuda grass seed, sunflower seed, lentils, birdsfoot trefoil seed, ramie for fiber, rough winter peas, lupine seed, millet foxtail seed, dill for oil, wormseed, guar, hemp fiber and seed, ginseng, flax fiber, sesame for seed, rapeseed, canary grass seed, bluestem seed, Alyce clover seed, hairy indigo, dallis grass seed, all other.

9/ Raspberries, blueberries, blackberries, currants, loganberries, boysenberries, youngberries, gooseberries, dewberries, all other.

10/ Mangoes, tangeloes, black walnuts, quinces, chestnuts, kumquats, coconuts, loquats, guavas, bananas, citron, all other.

REVISIONS IN ANNUAL ESTIMATES OF FARM INCOME AND EXPENDITURES, 1954-56

The following tables carry the estimates of gross farm income, production expenses, net farm income, and related series back to 1910 on an annual basis for the United States as a whole. State estimates will appear in the next issue, for release on September 17. Revisions for the most part are confined to the years 1954-56, and are based largely on information provided by the 1954 Census of Agriculture. Revisions are relatively small in the estimates of production expenses and in those of gross income from livestock, since last year's revisions incorporated most of the available Census information on these items. Revisions in gross income from crops, made in this issue, are fairly substantial but partly offsetting. By far the largest change is in cash receipts from corn, reflecting a considerable increase in the estimated volume of sales.

The present revisions were carried back only to 1954 because that is as far as the Department of Commerce is revising its national income and personal income series in the forthcoming July issue of the Survey of Current Business. It is expected that in July 1958 further revisions in farm income and expenditures will be made back to the previous census (1950).

Revisions for 1951-53 were made in two cases. These revisions did not affect the income totals previously published. One of these involved simply the shifting of income from the nonmoney to the cash categories. Sales of farm-churned butter in 1951-53, previously counted as home consumption, were shifted to the dairy receipts category. This produced revisions in the estimates of total cash receipts, total nonmoney income, and net cash income, but the major categories of gross farm income, production expenses, and net farm income were unchanged.

The second instance was in the estimates of numbers of farms used to derive averages of income per farm in table 9, page 26. These had previously been adjusted in line with the number of farms enumerated in the 1954 Census of Agriculture. But they had not been brought in line with the results of the post-enumeration survey, which indicated that the 1954 Census missed a considerably larger number of farms than the 1950 Census. Estimates of the number of farms in the first column of table 9 are revised upward for each year from 1951 through 1956. The largest revision is for 1954 -- from 5,100,000 to 5,201,000 farms. However, upward revisions in the aggregates of income for 1954-56 are largely offsetting as far as realized net income per farm is concerned.

In addition to the upward revisions in farm income, estimates of income received by the farm population from nonagricultural sources have also been raised for the last three years. This is in line with the 1955 total of nonfarm income received by farm families as obtained from the joint Census-AMS survey of farm expenditures in March 1956. This survey indicated a total of 6.3 billion dollars from nonfarm sources (excluding transfers) in

1955, as compared with the estimate of 6.1 billion previously published. The 1955 estimate has been raised to the survey level, the 1954 estimate has been adjusted from 5.7 to 5.8 billion, and the estimate for 1956 has been raised from 6.45 billion dollars to 6.7 billion. The 1956 revision reflects not only the higher level derived from the survey but also some upward revision in the Department of Commerce estimate of total national income from nonagricultural sources.

LIST OF TABLES

Annual Estimates for the United States, 1910-56

| <u>Table</u> | <u>Page</u> |
|---|-------------|
| 1. Realized gross and net income of farm operators from farming, 1910-56 | 18 |
| 2. Total gross and net income of farm operators from farming, 1910-56 | 19 |
| 3. Net income of the farm population, 1910-56 | 20 |
| 4. Net income originating in agriculture, 1910-56 | 21 |
| 5. National income and income of the nonfarm population, by source, 1910-56 | 22 |
| 6. Population estimates by residence and percentage ratios of farm population and farm income to national totals, 1910-56 | 23 |
| 7. Average per capita net income by residence and by source of income, 1910-56 | 24 |
| 8. Income of farm and factory workers, 1910-56 | 25 |
| 9. Number of farms and average farm income per farm, 1910-56 | 26 |
| 10. Purchasing power of net farm income, 1910-56 | 27 |
| 11. Gross farm income, 1910-56 | 28 |
| 12. Cash receipts from farm marketings of livestock and live-stock products, 1910-56 | 29 |
| 13. Cash receipts from farm marketings of crops, 1910-56 | 30 |
| 14. Nonmoney income furnished by farms, 1910-56 | 31 |
| 15. Production expenses of farm operators, 1910-56 | 32 |
| 16. Current farm operating expenses, 1910-56 | 33 |
| 17. Expenditures for hired farm labor, 1910-56 | 34 |
| 18. Repairs and operation of farm capital items, 1910-56 | 35 |
| 19. Farm capital expenditures and net investment, 1910-56 | 36 |
| 20. Farm depreciation and other capital consumption, 1910-56 | 37 |
| 21. Cash receipts, cash expenditures, and net cash income from farming, 1910-56 | 38 |
| 22. Reconciliation of net cash income with total net income of farm population from farming, 1910-56 | 39 |

Table 1.- Realized gross and net income of farm operators from farming, 1910-56 1/

1/ From table 4. 2/ From 1929 to date, Department of Commerce estimates adjusted to improve comparability with farm income; 1910-28, based on estimates published by the National Bureau of Economic Research. 3/ This total is approximately equal to the Department of Commerce series on personal income less transfer payments plus undistributed corporate profits (including inventory valuation adjustment). 4/ Includes farm wages of non-resident workers, farm mortgage interest, and net farm rents paid to nonfarm landlords (tables 15 and 17). May also be derived as the difference between the total net income originating in agriculture (table 4) and the net income of the farm population from agricultural sources (table 3). 5/ Represents the difference between national income from non-agricultural sources (second column) and the net income of the farm population from nonagricultural sources (table 3). There is no information on the latter for years prior to 1934.

Table 6.- Population estimates by residence and percentage ratios of farm population and farm income to national totals, 1910-56

| 1956 | 22,257 | 145,917 | 168,174 | 13.2 | 5.1 | 4.3 | 6.4 |

1/ Farm population as of April 1 and total population as of July 1 are taken as the closest readily available approximations of their respective annual averages. The difference between these two figures is the estimated annual average for the nonfarm population.

2/ Based on dollar totals given in tables 3 and 5; gaps arise from the same difficulty mentioned in footnote 4 of table 3.

Table 7.- Average per capita net income by residence and by source of income, 1910-56 1/

| Year | Average net income per capita of: | | | | | | | | | | |
|--|-----------------------------------|--------------------|------------------|----------------------------|----------------------------|--------------------|--------------------------|----------------------------|------------------------|------------------------|------------------|
| | Farm population | | | | | Nonfarm population | | | | | Total population |

| 1956 | 14,860 | 7,869 | 1,888 | 558 | 4,159 | 750 | 1.980 |

1/ Realized net income of farm operators including Government payments (from table 1), plus total farm wages (from table 17). 2/ Represents the average number of persons engaged in agriculture during the year, including farm operators and other family workers (except those doing housework only) as well as hired workers. 3/ Average weekly earnings of production workers or nonsupervisory employees in manufacturing, multiplied by 52.

Table 9.- Number of farms and average farm income per farm, 1910-56 1/

| Year | Number of farms | Realized gross income per farm | | | | Production expenses per farm | Operators' realized net income per farm | Operators' total net income per farm | Operators' net cash income per farm |
|------|-----------------------|------------------------------------|--------------------------|--------------------------|---------|------------------------------|---|--------------------------------------|-------------------------------------|
| | | Cash receipts from market- ings | Govern- ment payments | Realized nonmoney income | Total | | | | |

1/ Obtained by dividing appropriate totals and averages appearing in tables 1, 2, 3, 7, 9, and 21—all inclusive of Government payments--by the price indexes given in the first column. Gaps in the last two columns arise from the same difficulty mentioned in footnote 4 of table 3.

Table 11.- Gross farm income, 1910-56

| Year | Cash receipts | | | Nonmoney income | | Realized gross farm income | | Total gross farm income | |
|------|-----------------|-----------------|-----------------|-----------------|-----------------|--------------------------------|--------------------------------|--------------------------------|--------------------------------|

1/ From table 11. 2/ From table 16. 3/ Total cash wages from table 17, plus Social Security taxes paid by employers. 4/ From table 19. 5/ From table 15. 6/ This series includes share rent as well as cash rent paid to nonfarm landlords because their share is included in cash receipts shown in the first column. However, the series differs slightly from that on total net rent to nonfarm landlords shown in table 15, because the landlords' share of total expenditures on farm buildings--instead of their share in total depreciation--has been deducted from gross rent to arrive at the net rent series here shown.
 7/ From table 17.

Table 22.- Reconciliation of net cash income with total net income of farm population from farming, 1910-56

| Year | Plus | | | | Minus | | | | Equals: Total net income 6/ |

1/ From table 21. 2/ From table 14. 3/ From table 19. 4/ From table 17. 5/ Represents the difference between expenditures and depreciation on farm buildings owned by nonfarm landlords. It is equal to the difference between the two series on net rent to nonfarm landlords discussed in footnote 6 to table 21. 6/ From table 3. 7/ Includes Social Security taxes paid by employers.
